# Archive Storage Solutions

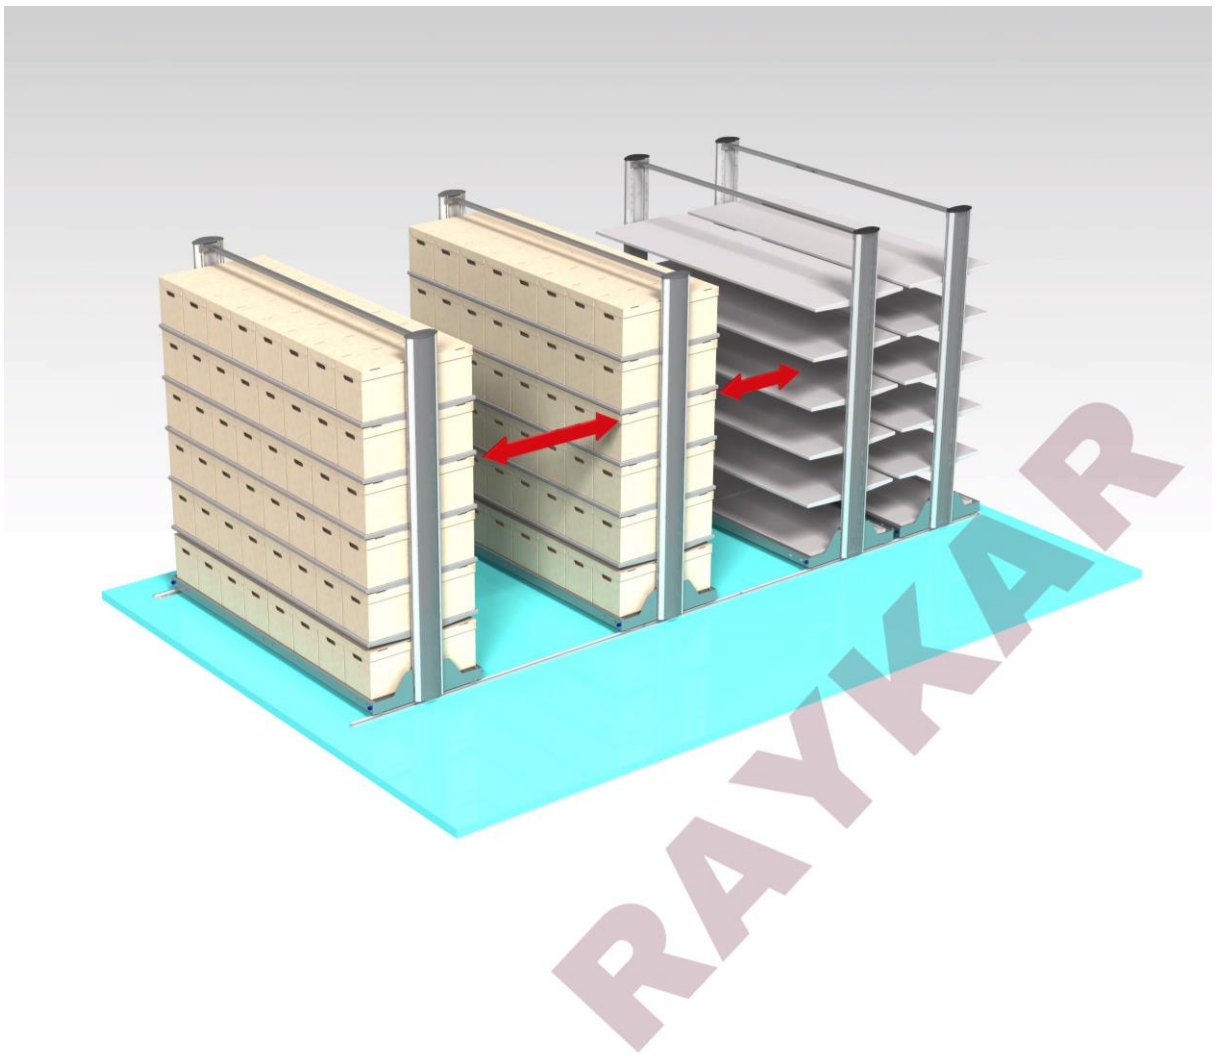

Companies often need large spaces cut out from the office space for efficient storage systems. But as RAYKAR we are able to implement compact and user-friendly storage solutions for you without overwhelming your office space. Our modular product line allows modern storage and accessibility.

A single shelving unit has the capacity to contain 96 standard archive boxes which will be positioned on each side of the unit. Every box holds 5 single files and 7 kg of paper in total.

If asked previously, our shelving units allow branding and other marketing objectives on the side of the units. With the branding option, these units can also participate in partitioning the office space or for simply decorating.

Our Archive Storage Solutions help you save on office space with its' structure that allows a railed mobility function. In addition, it gives the users a light and easy user experience while searching for specific documents.

Our railed systems do not require disturbing your floor and also very mobile for any needs of relocating within the store. If asked, we are also able to change the size of your storage area simply by adding more modular units to it.
