## LOCKERS

 **RAYKAR**  
KAR KAYAK SİSTEMLERİ  
[www.raykar.com.tr](http://www.raykar.com.tr)

Designed and produced by RAYKAR, our lockers and other similar storage equipments have the approval of Turkish Standard Institute as well as their proven record of top quality.

## TECHNICAL DETAILS OF STANDARD LOCKERS:

- 1-) Our standard lockers are produced out of 1 mm thick metal sheets.
- 2-) Surfaces on all sides of the lockers are specifically cleaned and painted with zinc-including high quality paints against possible future corrosion.
- 3-) In addition, all bottom surface of lockers are enhanced by plastic bases and has a special water dripping area against corrosion.
- 4-) All lockers include a multi-purpose shelf for gloves and helmets.
- 5-) All lockers have mirrors and hangers for a better user experience.
- 6-) Ergonomic interior design of our lockers make it possible to store up to three pairs of skiing equipment.
- 7-) All locker doors have digital locks available for customers to use with their passwords as well as the instructions for usage.
- 8-) All lockers have an interior settlement scheme.
- 9-) All lockers have their individual numbering on the front surface.
- 10-) All lockers are designed to be connected to both each other and to the walls they are located in front of due to safety reasons such as earthquakes.

## ADDITIONAL FEATURES OF LOCKERS WITH HEATER:

- 11-) Heating features for ski shoes via high-tech electrical solutions are standard in our lockers with heater.
- 12-) Preventive buttons for empty or unnecessary lockers to stop energy waste.
- 13-) Interior LED lighting for better user experience.
- 14-) Optional ventilation solutions if needed.

Electronic Heating

LED Lighting
